Podcast Elements: Cover Image, Show Description, etc.	The show elements felt rushed and messy. They didn't clearly align to produce a coherent show brand.	The show elements helped to highlight the themes of the show, but more attention to detail would have helped.	Each element was thoughtfully prepared, and matched the overall themes and feel of the show well.
Podcast Script Preparation	Podcast prep was pretty minimal. More attention to detail was needed to help this show shine.	This podcaster prepared for the show, but the quality of prep could have been more carefully and detailed.	This podcaster had a clear and careful plan for the show before recording. Pro podcaster style!
Final Podcast	This podcast was hard to follow. More practice and attention to the preparation process would have helped the themes shine through.	This podcast was pretty clear and easy to understand, but could have been more professional in its coherence and quality. A few more practice runs would have helped.	Wow! What a professionally prepared and interesting tiny podcast. Well done. Your podcast was well prepared, well performed, and interesting to listen to.
